

epCloud focuses on customer data

# Your Data, Enabled

epConnect™ does the heavy lifting for you

## epCloud

epCloud allows users to get the data that they need to improve their business. The epConnect platform includes epCloud which leverages existing cloud providers like Amazon, IBM and Microsoft. Using epGateway customers can quickly send data to the IT infrastructure they already use without going to custom cloud solutions.

### Compatibility with Cloud Providers

- epGateway is optimized for AWS, Azure or Bluemix for easy integration
- Data communication
- Provisioning and authentication
- Device management and updates
- Data connection to cloud provider tools for analytics and visualization
