

Wireless sensors for flexible deployment

Your Data, Enabled

epConnect™ does the heavy lifting for you

epSensors

epSensors are wireless or wired sensors that link physical data to epConnect. Sensor options include light, acceleration, pressure, temperature, humidity, and many more.

Sensors can be customized for customer specific requirements and integrate directly with epConnect.

epSensor products include:

- Wireless Sensor Network
- Low Power Design for Battery
- Configurable Sensors
 - › Temperature
 - › Humidity
 - › Accelerometer
 - › Light
- Indoor and Outdoor options

LORA

- LoRa
- GPS
- Arduino

SMARTMESH IP

- SmartMesh IP
- 1-Wire
- Pressure

WIFI

- Wi-Fi with BLE
- RS232 and RS485

BLE/THREAD

- BLE and THREAD
