EPM2M-AIRPRT-ESMV
Wired and Wireless Gateway

Embedded™ Planet

The EPM2M-AIRPRT-ESMV is a industrial grade monitoring system for overseeing the health status of passenger escalators and walkways in airports. This gateway is equipped with Cellular, WIFI or Ethernet capability for sending sensor data to the cloud. This information enables realtime status monitoring of airport assests to enable effecient deployment or service personell to prevent downtime.

Feature Summary:

Specification:	Description:
Monitoring:	Temperature and Vibration Motor and Gearbox Status Leak Detection Wireless Sensor Options
Cloud connecivity:	Azure, AWS, IBM
Cellular:	Cat 1 / Cat M / NB-IoT
Wi-Fi:	Dual-band 802.11abgn
Ethernet:	1x10 / 100 / 1000 Mbps
Power Input:	12 Volt Barrel Connector
