

epConnected Vehicle

OBD-II, Cellular, GPS

Product Contents

- Enclosure (containing boards, connectors, AT&T based SIM)
- GNSS & Cellular Antennae
- OBD-II Cable

Features

- Collect vehicle data (PIDs) and trouble codes (DTCs)
 - Compatible with nearly all cars and light duty trucks starting with 1996 model years
- Data transmitted over cellular
 - LTE Cat-M1
- Tracks vehicle location
- Monitored PIDs:
 - Fuel Level, Vehicle Speed, Engine RPM, Engine Load, Coolant Temp, Air Flow Rate, Control Module Voltage
- Dashboard allows users to visualize all data and alarms
- SMS/Email Alerts for PIDs out of range and any received DTCs
- Monitor one vehicle or a large fleet
- Be alerted of issues before a vehicle breaks down

Quick Start

1. Secure enclosure to vehicle
2. Secure antennas to vehicle & connect to unit
3. Connect OBD-II cable to vehicle & enclosure
4. Turn on vehicle engine
5. View data on dashboard & receive alarms

Customize

- Reach out to EPI to discuss customizing:
- Dashboard
 - Protocols
